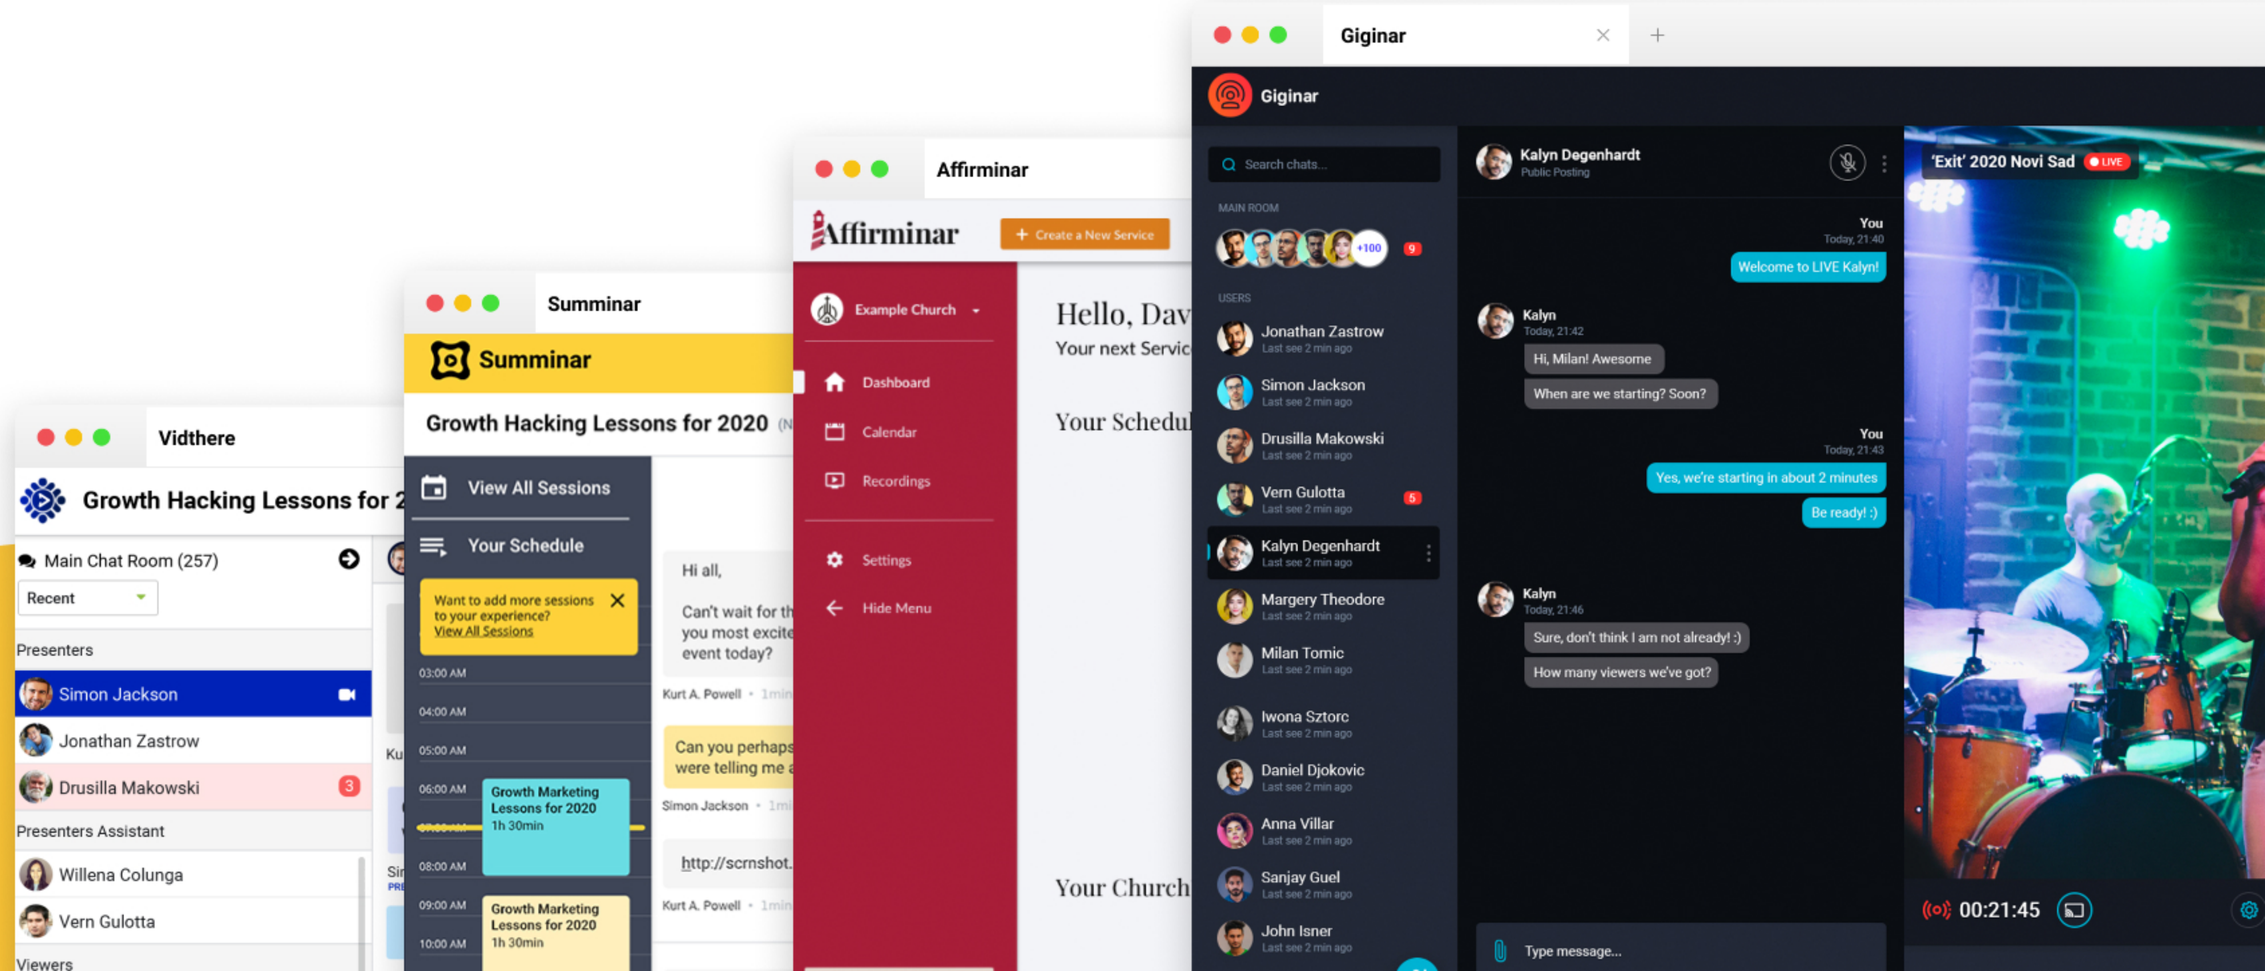
Live video platforms

for your unique requirements



About NOVP

NOVP was founded in 2012 to deliver complex video workflow solutions to the Hollywood movie industry, listing clients such as Technicolor and Warner Bros. as early customers.

In 2015 we started work on our first live streaming platform, and to date have hosted over 75,000 live webinars on our video platforms.

In addition to our own video platforms, we undertake some professional services work, specialising on more complex video products.

Prior to founding NOVP, our CEO and CTO founded InPlayer.com, then the leading provider of online video pay-per-view and subscription video on demand solutions.

Giginar

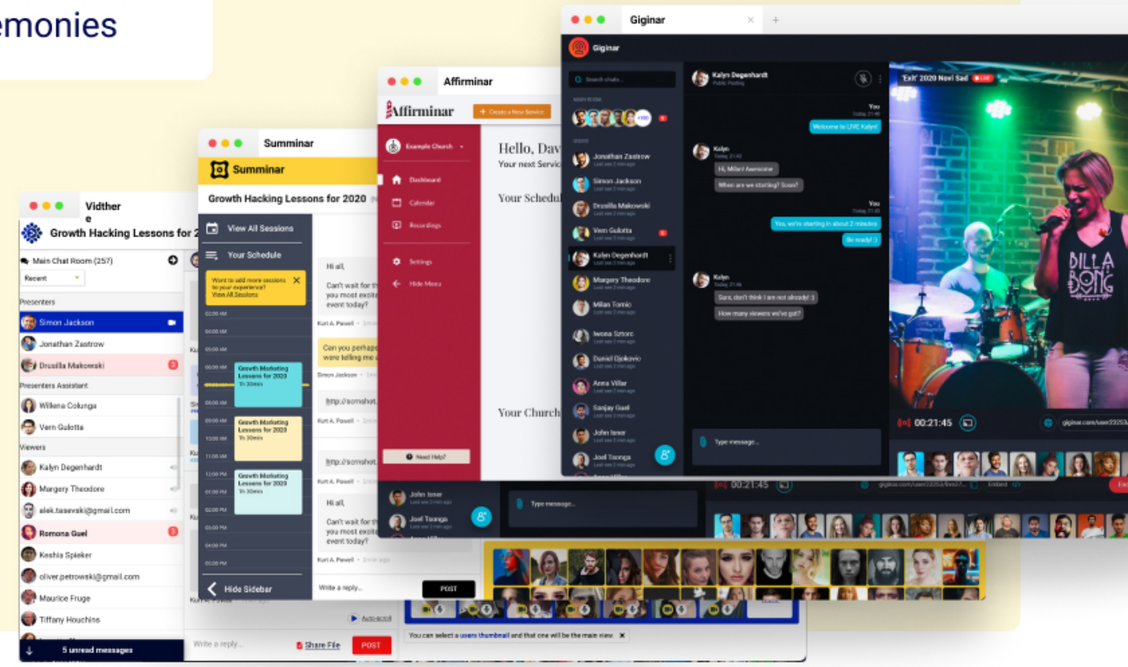
Vidthere

Summinar

Unicorn Meetings

NOVP has partnered up with, and is currently working alongside Event Sound & Light Ltd. The intention is to take this platform and develop it further, offering the Live experience and interaction within the following sectors;

- Live Entertainment
- Live Broadcast/Streaming
- Church & Funeral services
- Wedding Ceremonies



Key Features NOVP

Scheduled & 'Start Now'

Either pick a time you want to deliver your planned webinar, allow users to watch at a time that suits them, or choose the 'start now' option for immediate events.

Fully browser based

Fully browser-based, no downloads required. Both host and attendees can access the event via a simple link.

Multiple Sharing Modes

With screen sharing, picture-in-picture and whiteboard capabilities, you can deliver your message with ease. Hybrid mode allows the sharing of Audio and Video files too!

White Labelling

You can fully customise your registration page and add a CNAME to make your webinar on-brand and to portray the correct image.

Events and Matrix View

Our unique dashboard layout allows you to see upcoming and past events in your Calendar to organise your time wisely. WE also have a 'conventional' library view.

Detailed Statistics

You can see detailed statistics for all events, including who dropped out and when. Exportable CSV's are available with a list of your attendees to make post-event-handling easy for you.

Full Chat Functionality

Easy to use chat functionality, with a clear interface and chat assistant options to enable an attendee take-over the chat while you can focus on delivering your meeting or webinar.

Configurable Emails

Pre-event reminder emails allow your attendees to organise their schedule and ensure that no one misses your event. Follow up emails gives access to a replay of the event (optional)

Co-hosts & Presenters

Our unique co-host feature allows up to 4 people at one time to present during a webinar. You can also give full presenter rights to anyone, at any time.

Pay-per-view & Tips

Pay-per-view events are a perfect solution for more exclusive content. You set a price, your attendee pays at registration and they can access the event. Tip feature optional if required.

PIN Protected Events

Feel safe in all meetings and webinars with optional pin protection. Have full control on who enters your event with the 'lock' feature which will notify you when someone wants to join.

Zapier and Autoresponders

Full Zapier support for Webinar registrants trigger actions.You can connect the autoresponder integration you are using natively or using Zapier.

Sub Accounts

Create sub-accounts for employees, colleagues and partners so they can create their own meetings and webinars. Manage their access from your main account.

Call to Action Buttons

Set up buttons and links to external sources before the event. Poll and survey integration for immediate feedback on your questions.

Recordings and Replays

All events are recorded by default (ability to turn off) Recordings can be automatically shared with attendees and replays are available through your event link.

Live Audience

Camera/Microphone mode is not just for meetings. You can choose if you want audience participation during your webinar for a more 'live event' feel.

Recurring Meeting Rooms

Friendly URL links that you can share with your colleagues. You will receive a notification when someone is ready in your room to have a meeting.

Content Directory

A library of media ready to incorporate into your own event. Whether it's a powerpoint, video or a keynote speaker - you can build up your webinar easily with relevant content.

Dedicated Support

Our team offers dedicated support for end users and audiences, and also full, personal account management for each and every customer.
